Name Alston
Distance ...... Direction ......

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

8 FEB 1911

REGISTER OF RAINFALL IN 1910.

Kept at Lowbyer Manor House Alston.

in the County of Cumberland. 5

by J. R. Walton

RAIN GAUGE
Pattern Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 920 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
2 JAN 1911

Kept at Bassenfell, Cockermouth
in the County of Cumberland   2
by W. Smith, Gardener to Mrs D. G. Rathbone.

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground ft. 12 in.
" " " Sea Level 384 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name "Bassenthwaite Lake"
Distance 2 miles Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Kept at Borrowdale Grange

in the County of Cumberland 2

by Mr J. Threlkeld

RAIN GAUGE
Pattern
Diameter of top ______ in.
Height of top above Ground ______ ft. ______ in.
" " " Sea Level ______ ft.

Time of Observation

Nearest Railway Station
Name
Distance ______ Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BROUGHTON GRANGE

1901 – 1910

MET/2/4/1/1/6/3/2686

REGIS 01

Kept at Broughton Grange n
near Cockermouth S. Wilson

Latitude 3° 25′ 15″

Longitude 54° 40′ 15″

Tim

bove Ground 1′ 3″

bove Sea Level 209

Condensed Instructions.—Fix the g of trees and walls, empty it daily at 9 a.m., and enter it against the precedin entered as rain, an "S" being prefixed. With a low temperature and high wind, it is sometimes blown out of the funnel; then take one-twelfth of the average depth of snow and enter that as the yield of water—*e.g.*, 3 inches snow = ·25 of rain. When there is no rain, a line should be drawn, rather than cyphers inserted.

Accurate observers of rainfall will oblige by sending a copy of their record to Mr. G. J. Symons, of 62, Camden Square, London, N.W., for insertion in his annual tables of *British Rainfall*, which now contain returns from more than 1500 stations.

Additional Copies of this form (price 3d. each) can be obtained of the above, from Mr. Stanford, 55, *Charing Cross, and from all the leading opticians.*

REGISTER OF RAINFALL IN 1901

Kept at Broughton Grange near Cockermouth *in the County of* Cumberland *by* G. S. Wilson

Latitude 3° 25′ 15″

Longitude 54° 40′ 15″

Time of Observation 9 am

Height of Receiver of Rain Gauge. Above Ground 1′ 3″

Above Sea Level 209

Condensed Instructions.—Fix the gauge firmly, with its orifice level and 1 ft. above the ground, quite clear of trees and walls, empty it daily at 9 a.m., and enter it against the preceding day. Snow should be melted slowly in a closed vessel and the amount entered as rain, an "S" being prefixed. With a low temperature and high wind, it is sometimes blown out of the funnel; then take one-twelfth of the average depth of snow and enter that as the yield of water—*e.g.*, 3 inches snow= ·25 of rain. When there is no rain, a line should be drawn, rather than cyphers inserted.

REGISTER OF RAINFALL IN 1910

FORM A. BRITISH RAINFALL.

3 JAN 1911

Kept at Brunstock

in the County of Cumberland 1

by M. T. Scott.

Rain Gauge
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
„ „ „ Sea Level 86 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Carlisle
Distance 3 m Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL 10

FORM A2.
BRITISH RAINFALL
4 JAN 1911

Kept at Spital Carlisle

in the County of Cumberland

by J T Charlton 1

RAIN GAUGE
Pattern Negretti
Diameter of top 8 in.
Height of top above Ground 4 ft. – in.
" " " Sea Level 118 ft.

Time of Observation 9 am

Nearest Railway Station
Name Carlisle
Distance 1m. Direction N E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

-7 JAN 1910

Kept at Isel Vicarage

in the County of Cumberland

by Rev: W. Vale Bagshawe

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 200 ft.

Time of Observation 9 am

Nearest Railway Station
Name Cockermouth
Distance 4 miles Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

-3 JAN 1911

Kept at Ringingstone, Egremont

in the County of Cumberland 3

by Harold Adair

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 260 ft.

Time of Observation 9 am

Nearest Railway Station
Name Egremont
Distance 1 mile Direction N. E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1908.

FORM A.
BRITISH RAINFALL.

Kept at Frizington

in the County of Cumberland.

by The Parkside Mining Coy.
per. H. Norman Morris.

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 20 ft. - in.
" " " Sea Level 320 ft.

Time of Observation 9. 30 A. M.

Nearest Railway Station
Name Frizington
Distance 1/4 Mile Direction S.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909.

FORM A2. BRITISH RAINFALL.

12 FEB 1910

Kept at Geltsdale

in the County of Cumberland

by Hy. Marks Ex JCB

RAIN GAUGE
Pattern Snowdon
Diameter of top 5. in.
Height of top above Ground 1 ft. 2 in.
„ „ „ Sea Level 778 ft.

Time of Observation 9 am.

Nearest Railway Station
Name How Mill
Distance 5 3/4 mls Direction N.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
3 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Gosforth

in the County of Cumberland

by W. H. Kitchin

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 185 ft.

Time of Observation 9. am

Nearest Railway Station
Name Seascale
Distance 3½ m Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

3 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Belle Vue, Greystoke, Penrith

in the County of Cumberland

by Miss E. Rowe

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 4 ft. in.
" " " Sea Level 680 ft.

Time of Observation 9 p.m

Nearest Railway Station
Name Blencowe, C.K.&P.Ry
Distance 2 mile Direction E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

4 JAN 1911

Kept at Belle Vue, Greystoke, Penrith (88)
in the County of Cumberland.
by E. A. Rowe

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 4 ft. in.
" " " Sea Level 680 ft.

Time of Observation 9 p.m

Nearest Railway Station
Name Blencowe, C. K. & P. Ry
Distance 1½ m. Direction E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

25 JAN 1911

FORM A. BRITISH RAINFALL. 2/47

Kept at Keswick The Bank

in the County of Cumberland 2

by Mr R. W. Mayson

RAIN GAUGE
Pattern
Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
4 JAN 1910

Kept at Aspatria Agricultural College

in the County of Cumberland

by J Smith Hill, BA, BSc, JP.

Rain Gauge
Pattern M.O.
Diameter of top 8" in.
Height of top above Ground 1 ft. in.
" " " Sea Level 250 ft.

Time of Observation 9a

Nearest Railway Station
Name Aspatria
Distance 1/3 mile Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

CUMBERLAND

NETHERHALL.

"MAʳYPORT."

1910.

MET/2/4/1/1/6/3/11969

FORM A2.
BRITISH RAINFALL.
18 JAN 1911

Kept at Netherhall, t Known

b 5½ in.

bove Ground ft. 6 in.

in the County of Cum ,, Sea Level 24 ft.

7.30 a.m.

by William Stirton J Name Maryport

Distance 2¼ Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.
no Rain

The returns are not complete, as I was sometime here, before I was told to take a note of the rain. William Stirton (Gardener)

REGISTER OF RAINFALL IN 1910

FORM A2
BRITISH RAINFALL
-3 JAN 1911

Kept at Newby Grange, Crosby on Eden

in the County of Cumberland 1

by T. H. Hodgson

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground — ft. 8 in.
" " " Sea Level 64 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Heads Nook, N.E.R
Distance 3 m. Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

31 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at The Priory St Bees

in the County of Cumberland 3

by Rev R. H. Snape

Rain Gauge { Pattern
Diameter of top .... in.
Height of top above Ground .... ft. .... in.
" " " Sea Level .... ft.

Time of Observation

Nearest Railway Station { Name
Distance .... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
8 JAN 1910

Kept at Seascale

in the County of Cumberland

by Robert Hellon

Rain Gauge
Pattern Standard Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 52 ft.

Time of Observation 8.30 a.m.

Nearest Railway Station
Name Seascale
Distance 100 Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
16 JAN 1911

3

Kept at Seascale

in the County of Cumberland

by Robert Hellon

Rain Gauge:
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 52 ft.

Time of Observation 8.30 a.m.

Nearest Railway Station:
Name Seascale
Distance 100 yds Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
18 JAN 1910

Kept at Blencathra Sanatorium

in the County of Cumberland

by W. Goodchild   Ex. JCG

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground ~~890~~ 1 ft. in.
" " " Sea Level 890 ft.

Time of Observation 9.0 am

Nearest Railway Station
Name Threlkeld CK+PR
Distance 2 Direction ESE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RA

FORM A2.
BRITISH RAINFALL.

5 JAN 1910

Kept at Chapelhouse Reservoir, Uldale

in the County of Cumberland

by T. Strong

RAIN GAUGE
Pattern M.O.
Diameter of top 8" in.
Height of top above Ground 1 ft. in.
" " " Sea Level 600 ft.

Time of Observation 9 a.

Nearest Railway Station
Name Mealsgate
Distance 5m Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2.
BRITISH RAINFALL.
6 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Whinfell Hall
in the County of Cumberland
by Frances M. Peile

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 1 in.
„ „ „ Sea Level 255 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Cockermouth
Distance 4½ Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

WHITEHAVEN

"20 IRISH STREET"

1909 – 1910

MET 12/4/1/1/6/3/18381

FORM A2.
BRITISH RAINFALL.
10 JAN 1910

Kept at 20 Irish Street …don

in the County of Cumber… …5 in.

…Ground 1 ft. in.

…ea Level 15 ft.

by Dr Eldon Pratt …ame Corkickle

…istance ½ m. Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGIS 9

FORM A2.
BRITISH RAINFALL.
10 JAN 1910

Kept at 20 Irish Street, Whitehaven

in the County of Cumberland Ex 9a

by Dr. Eldon Pratt

Rain Gauge
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 15 ft.

Time of Observation 9 am.

Nearest Railway Station
Name Corkickle
Distance ½ m. Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Kept at Wigton Brookfield 1
in the County of Cumberland
by J. R. Marsh Esq

RAIN GAUGE
Pattern
Diameter of top .... in.
Height of top above Ground .... ft. .... in.
" " " Sea Level .... ft.
Time of Observation
Nearest Railway Station Name
Distance .... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
